

The latest development from Müller & Bauer is screw-lid tins made from tinfoil or aluminum.

These tins feature lids with a flowed-in compound gasket, or a full disk liner, making them absolutely tight, both in transit and in the store display.

The screw-lid tins are especially suitable for shoe polish and wax. And because we use only food-grade coatings, our screw-lid tins may also be used for cosmetic packaging.

Currently we offer 2 different versions in \varnothing 75 mm with a content of 75 mL and 150 mL (2.5 fl.oz. and 5 fl.oz).

In development are tins with a volume of 200 mL, 250 mL and 375 mL up to 1000 mL in \varnothing 99 mm.
